Women Can Do It Too

. By: Courtney Lucas

Back in the day most women
“Worked” at home
They didn’t have a chance
To go out and roame -
They didn’t have many rights
So in that case they couldn’t reach
Many heights
All the men did the “hard work”
But when the women would try to do that
All the men would smirk
But as of now, in 2018
You see women doctors,
Firefighters, police officers, homicide hunters
ANY career you can think of, best believe there is a
Woman doing it
